

The Meridian Daily!

Annual Sports Day

Well done Discovery!

On Thursday the 6th of June 2019, Meridian Primary School held their annual sports day, which took place on their back field, during healthy living week. The day started off by KS1 children being taken out by their team's house captains. They started on the activities in the grid, then went to do their flat races and ended with the year 2 relay race. Whilst the children were being given their ice lollies, the points were being counted up... in 4th place with 537 points was Voyager, in 3rd place with 547 points was Explorer, in 2^d place with 629 points was Challenger and finally in 1st place with a whopping 672 points was Discovery! Now a quote from Discovery house captains "We are very proud of Discovery and would like to congratulate all of the houses for doing such a fantastic job!"

Later during the day, it KS2 was children's turn. The afternoon set off as the children were led out of the hall whilst chanting excitedly! They started on the grid activities, which there are 8 of for each Key Stage. After this, it was time for the throwing events where Year 3 and 4 did shot put, Year 5 did discus and Year 6 did javelin. Next the flat races took place and shortly after they had finished the relay began.

Then the children were given ice lollies and the KS1 children came out to hear the results for KS2: in 4th place with 827 points was Explorer, in 3rd place with 960 points was Challenger, in 2nd place with 1002 points was

Discovery and finally in 1st place with an impressive 1009 points was Voyager! Everyone was now very nervous but excited.

But at last the results for overall were to be announced: in 4th place with an amazing score of 15944 was Explorer, in 3rd place with an incredible score of 1776 was Voyager, in 2nd place with a fantastic score of 1829, leaving 1st place to be Discovery with a fabulous score of 2024!

The day ended by everyone in Discovery getting a lovely team photo, which I would say was a wonderful ending to a wonderful day!
